

Linmore LED
ULTRALINK+
WIRELESS CONTROLS SIMPLIFIED

TAKE LIGHTING CONTROLS TO THE NEXT LEVEL

Large Projects

Supports up to 32,000 devices per network. The more devices, the more robust the system becomes.

Up to 16 Scenes

Allows for more customization options for increased convenience, functionality and energy savings.

Seamless Integration

Easily integrates with existing BMS, HVAC, DMX, and Bluetooth SIG compatible devices.

WHY CHOOSE ULTRALINK+

UltraLink+ provides all the basic lighting controls functions while leveraging Bluetooth NLC with distributed intelligence in a robust mesh network, ensuring seamless scalability across large areas.

With support for more devices per zone and effortless integration with existing systems, it ensures a fully connected, secure, efficient, and future-proof lighting solution.
