

Lexington Towne Center

LinmoreLED
ULTRA PERFORMANCE LIGHTING

CASE STUDY

Location: **Lexington, SC**

Application: **Retail Parking Lot**

Site Lighter Area Light (SL1)

The SL1 is a built-to-last LED fixture offering a superior combination of performance, value, and form factor. The unique housing is made of extruded aluminum, which is exceptional at moving thermal energy. Beyond its thermal efficiency, the aesthetics are modern and attractive. Efficacy averages 165 lumens/watt, and has a variety of optic options to direct the light where it is needed.

RESULTS

Big V Properties replaced the existing 1000W metal halides at Lexington Towne Center with 300W Site Lighters (SL1). Light levels increased from 2 to 5.7 footcandles, improving visibility and safety of employees and guests while reducing the operating costs of the retail center.
