

Lodi Toyota

CASE STUDY

Location: Lodi, California

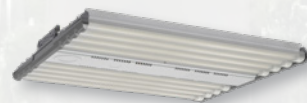

Application: Car Dealership

Partner: True North LED

Site Lighter (SL1)

The SL1 is a superior combination of performance, value, and form factor. The unique housing is made of extruded aluminum, which is exceptional at moving thermal energy. The SL1 aesthetics are modern and attractive.

Commercial High Bay (CH2)

The CH2 Series has features customers value the most: quality, reliability, compact size and performance in a cost-effective design. The CH2 Series takes our award-winning technology from the Essentials Series and puts it into a more value-centered platform.

RESULTS

Lodi Toyota replaced 40 T5 high bays with the same number of CH2 Series High Bays in the shop areas. In the outdoor areas, they replaced 146 HID fixtures with 134 SL1 LED fixtures. The increased lumen output from the upgrade increased safety and productivity of guests and employees.
