

ULPLUS-KEY

UltraLink+ Wireless Keycard Access Control

The **ULPLUS-KEY** is a **Bluetooth NLC Wireless Keycard Access Control**. This battery-powered key card system automates room settings by activating lights, HVAC, curtains, and more when a guest inserts their card upon entry. When the card is removed, the system deactivates these features, optionally with a delay, to optimize energy use. Its wireless design enables easy installation even in challenging environments like historical buildings or glass partitions. It connects via Bluetooth and can be accessed with the UltraLink+ web portal or mobile app for setup and configuration.

TECHNICAL SPECIFICATIONS¹

- **Mounting:** Surface Mounted with Screws or Adhesive Tape.
- **Battery Model:** CR2477.
- **Battery Life:** 5 years.
- **Max Bluetooth Range:** 200ft (60m) line of sight.

LISTINGS

- FCC, UL

FEATURES

- When the guest enters his/her room, the insertion of the key into the slot activates whichever is the intended effect. From the simple powering of the entire room with a BT relay, to the most sophisticated welcome scene including the gradual turning ON of the lights, opening the motorized curtains, HVAC at a specific setting, subtle accents of music and more.
- When the guest leaves the room and takes the key with him/her, with or without a set delay, the vacant room settings become effective.
- Its wireless technology allows for installations that would be extremely difficult or impossible, such as historical buildings, glass walls, furniture and thin partitions.
- Provides convenient control of lighting and a wide variety of electric loads, activating them when a standard key card is inserted and deactivating with or without a delay when the card is removed.
- Suitable for Indoor use.
- Mobile app available for iOS and Android devices.

ORDERING

Part Number	Description
